Question Paper Code: 56A02

B.E./B.Tech. DEGREE EXAMINATION, APRIL 2019

Sixth Semester

Agriculture Engineering

| | | \mathcal{E} | \mathcal{E} | |
|----|------------------------|---------------------|----------------------------------|----------------------|
| | 15UAG602 - HYI | OROLOGY AND | WATER RESOURCES ENGI | INEERING |
| | | (Regu | lation 2015) | |
| Du | ration: Three hours | | Maximun | n: 100 Marks |
| | | Answer A | ALL Questions | |
| | | PART A - (1 | 10x 1 = 10 Marks | |
| 1. | Hydrology helps in | | | CO1- R |
| | (a) Predicting maxim | um flows | (b) Deciding reservoir capac | ity |
| | (c) Study of run off | | (d) All the above | |
| 2. | Rain gauges are used | to find the | rainfall over an area | CO1- R |
| | (a) Maximum | (b) Minimum | (c) Average | (d) All the above |
| 3. | In India generally rai | nfall is recorded a | t | CO2- R |
| | (a) 10 am | (b) 6 am | (c) 8 am | (d) 4 pm |
| 4. | Hydrograph is a grap | h showing | | CO2- R |
| | (a) Cumulative rainfa | all versus time (1 | b) Cumulative rainfall versus v | relocity |
| | (c) Average rainfall v | versus time (| d) Cumulative rainfall versus is | ntensity of rainfall |
| 5. | Surface run off is the | quantity of water | | CO3- R |
| | (a) Number of voids | present in the soil | (b) Shape and size of soils p | articles |
| | (c) Compaction of the | e soil particles | (d) All the above | |
| 6. | Following one is not | used to control flo | oods | CO3- R |
| | (a) Levees | (b) Guide banks | (c) Groynes | (d) Regulators |

| 7. | Infilt | tration capacity o | f soil depends upon | | CO4- R | |
|-----|---|---|--|--|------------------------------------|------|
| | (a) N | Number of voids | present in the soil (| b) Shape and size of soils | particles | |
| | (c) (| Compaction of th | e soil particles (| d) All the above | | |
| 8. | Rain | Water Harvestin | g is practiced to | | CO4-R | |
| | (a) C | Control flood | (b) Protect environme | ent (c) Save water | (d) Save forest | |
| 9 | The | following is not t | he type of aquifer | | CO5- R | |
| | (a) C | Confined aquifer | (b) Complete aquifer | (c) Aquifuge | (d) Aquitard | |
| 10 | Artif | icial recharge me | eans | | CO5- R | |
| | (a) Ir | ncreasing the Gro | ound water table | (b) Increasing the Re | servoir water table | |
| | (c) D | ecreasing the Gr | ound water table | (d) None of the above | e | |
| | | | PART – B (5 x 2 | = 10 Marks) | | |
| 11. | Write any three practical applications of hydrology. CO1- R | | | | | |
| 12. | Define Hydrograph. | | | | | |
| 13. | 3. Write the uses of run-off. | | | | CO3- R | |
| 14. | 4. List the various zones in reservoir. | | | | CO4- R | |
| 15. | Dist | inguish between | aquiclude and aquitard | | CO5- U | |
| | | | PART - C(5x) | x 16= 80 Marks) | | |
| 16. | (a) | _ | ` | s of determining the avera | ge CO1- App | (16) |
| | | | Or | | | |
| | (b) | TamilNadu in following data (Above MSL), humidity- 60%. Consider the la | the month of Novembare available: Latitude Mean monthly tempore, sunshine – 8hrs/day, and surface is close – get-20.80 mm of Hg, Ha- | piration from an area per by penman's formula ide - 20°, Elevation – erature - 23°C, Mean rown Wind velocity (u2)- 80km round green crop. Assum 11.2 mm of water per day | a. The 200m elative m/day. ne A is | (16) |

| 17. | (a) | Discuss the various characteristics of catchment and factors affecting the runoff. | CO2- Ana | (16) |
|-----|-----|---|----------|------|
| | | Or | | |
| | (b) | Write briefly about the methods of estimating the run-off in detail. | CO2- Ana | (16) |
| 18. | (a) | Discuss the various meteorological and hydrological data's required for estimation of flood. | CO3- Ana | (16) |
| | | Or | | |
| | (b) | Explain natural disaster in India with suitable examples. | CO3- Ana | (16) |
| 19. | (a) | Summarize the general principles to be followed while designing the reservoir. | CO4- U | (16) |
| | | Or | | |
| | (b) | Discuss the various flood control methods. | CO2- Ana | (16) |
| 20. | (a) | Elaborate on Rain Water Harvesting. With neat sketch the explain the Rain Water Harvesting for a school building. Or | CO5- U | (16) |
| | (b) | Discuss the classification of aquifers with neat sketches. | CO5- U | (16) |
