Question Paper Code: 31107

B.E. / B.Tech. DEGREE EXAMINATION, MAY 2016

First Semester

Civil Engineering

01UME107-ENGINEERING GRAPHICS

(Common to ALL Branches)

(Regulation 2013)

Duration: Threehours

Maximum: 100 Marks

Answer ALL Questions

(5 x 20 = 100 Marks)

1. (a) Draw the top, front and left side views of the object shown below.

(20)

All dimensions are in *mm*

Or

(b) Draw the top, front and right side views of the object shown below.

(20)

All dimensions are in *mm*

2. (a) A straight line *AB*, 80 *mm* long has its end *A*, 50 *mm* in front of *VP* and 15 *mm* above *HP*. The length of the top view of the line is 52 *mm*. The end *B* is 15 *mm* in front of *VP* and above *HP*. Draw the front view and measure its length. Also determine the true inclinations of the line. (20)

Or

- (b) A circular plate of diameter 70 *mm* has the end *P* of the diameter *PQ* in the *HP* and the plate is inclined at 40° to the *HP*. Draw its projections when the diameter *PQ* appears to make 45° to the *VP* in the top view. (20)

3. (a) A tetrahedron of side 50 *mm* is resting on *HP* on one base side such that its axis is parallel to *VP* and 30° to *HP*. Draw the projections. (20)

Or

- (b) Draw the projections of a square pyramid of base side 40 *mm* and axis 60 *mm* when it is resting on *HP* on one of its base corners with a base side containing the corner making 35° with *HP*. The axis is inclined at 30° to *VP* and is parallel to *HP*. (20)

4. (a) A pentagonal pyramid of base side 35 mm and altitude 70 mm rests on HP on its base with an edge of the base parallel to the VP. It is cut by a vertical plane inclined at 45° to VP at a distance of 8 mm from the axis. Draw top view, sectional front view and true shape of section. (20)

Or

- (b) A cone of base diameter 60 mm and axis 70 mm is resting on HP with its base. It is cut by a section plane 30° to HP bisecting the axis. Draw the development of the surfaces. (20)
5. (a) A square prism of base side 40 mm and height 65 mm rest on one of its ends on HP. All the base sides of the prism are equally inclined to VP. It is cut by a plane perpendicular to VP and inclined at 45° to HP passes through a point on the axis 10 mm from the top. Draw isometric view of truncated portion of prism. (20)

Or

- (b) A pentagonal pyramid of 30 mm edge of the base and 65 mm height stands on HP such that an edge of the base is parallel to VP and nearer to it. A sectional plane perpendicular to VP and 30° to HP cuts the pyramid passing through a point on the axis at a height of 35 mm from the base. Draw isometric view of truncated portion of pyramid. (20)
