**Question Paper Code: 55105** 

## B.E. / B.Tech. DEGREE EXAMINATION, NOV 2019

Fifth Semester

Civil Engineering

## 01UCE505 - WATER SUPPLY ENGINEERING

(Regulation 2013)

Duration: Three hours Maximum: 100 Marks

## **Answer ALL Questions**

PART A -  $(10 \times 2 = 20 \text{ Marks})$ 

- 1. List the various types of water demand.
- 2. Identify the factors governing design period.
- 3. What are the factors governing the location of an intake?
- 4. What are the factors involved in the selection of pipe materials?
- 5. Distinguish between coagulation and flocculation.
- 6. How will you remove the iron and manganese from the water?
- 7. Define adsorption.
- 8. Differentiate desalination and demineralization.
- 9. State the functions of service reservoir.
- 10. Name the various methods of distribution systems.

## PART - B (5 x 16 = 80 Marks)

11. (a) (i) Given the following data, calculate the future population for the year 2030 by incremental increase method. (8)

Year	1970	1970 1980		2000	2010	
Population	85000	110500	144000	184000	221000	

			Year	1970	1980	1990	2000	2010		
			Population	85000	110500	144000	184000	221000		
		(ii) Discuss the factors affecting per capita demand.								
					O	r				
	(b)	(i)	Explain the	various sou	rces of wate	er.			(8)	
		(ii)	Enumerate examination		eal and ch	nemical cha	aracteristics	of water	and their (8)	
12.	(a)	Exp	olain the diffe	erent types of	of Intake str	uctures.			(16)	
					O	r				
	(b)	(i)	Discuss the s	steps involv	ed in laying	g of water su	upply pipes.		(8)	
		(ii)	Discuss the	factors invo	olved in the	selection of	f pumps for	water supp	ly schemes. (8)	
13.	(a)	Enu	imerate the co	oagulation a	and floccula	tion process	s in detail.		(16)	
					O	r				
	(b)	Inte	erpret the vari	ous disinfe	ction proces	sses in detai	1.		(16)	
14.	(a)	(i)	Explain the 2	Zeolite met	hod of wate	r softening	with its adv	antages.	(10)	
		(ii)	With a neat s	sketch expl	ain the reve	rse osmosis	method for	desalination	n. (6)	

Or

(b) Explain the recent advances in water treatment processes. (16)

15. (a) Discuss about the service reservoirs in detail. (16)

Or

(b) Describe the various methods of installation of water mains. (16)
