

Reg. No. :

--	--	--	--	--	--	--	--	--	--

Question Paper Code: 43023

B.E. / B.Tech. DEGREE EXAMINATION, DEC 2020

Third Semester

Computer Science and Engineering

14UCS303 - COMPUTER ORGANIZATION AND ARCHITECTURE

(Regulation 2014)

Duration: One hour

Maximum: 30 Marks

PART A - (6 x 1 = 6 Marks)

(Answer any six of the following questions)

1. The time between the start and completion of a task is referred to as

- (a) Response time (b) Execution time (c) Throughput (d) Both a and b

2. The BSA instruction is

- (a) Branch and Store Accumulator (b) Branch and Save return Address
(c) Branch and Shift Address (d) Branch and Show Accumulator

3. How many full adders are required for k bit addition?

- (a) k (b) $k+1$ (c) $2k$ (d) $k-1$

4. The processor keeps track of the results of its operations using a flags called

- (a) Conditional code flags (b) Test output flags
(c) Type flags (d) None of these

5. The condition observed in the following sequence of instructions is

Add $r1, r2$

Add $r1, r3$

- (a) Data hazard (b) Data dependence
(c) Structural hazard (d) Normal sequence

6. The throughput of an ideal pipeline with k stages is _____ instruction/clock cycle.

- (a) k (b) $k-1$ (c) 1 (d) 2

7. The cost of parallel processing is primarily determined by

- (a) Time complexity (b) Switching complexity
(c) Circuit complexity (d) None of the above

8. When instruction i and instruction j are tends to write same register or memory location, it is called

- (a) Input dependence (b) Output dependence
(c) Ideal pipeline (d) Digital call

9. The signal sent to the device from the processor to the device after receiving an Interrupt is

- (a) Interrupt-acknowledge (b) Return signal
(c) Service signal (d) Permission signal

10. The extra time needed to bring the data into memory in case of a miss is called as

- (a) Delay (b) Propagation time (c) Miss penalty (d) Data latency

PART – B (3 x 8= 24 Marks)

(Answer any three of the following questions)

11. What do you mean by addressing modes? Explain the types of addressing modes that exists in modern processors? (8)

Load $20(R1), R5$

Add $-(R2), R5$

12. Illustrate non-restoring division algorithm with an example. (8)

13. Explain the super scalar operations with a neat diagram. (8)

14. Explain Flynn's classification of computers. (8)

15. Explain the virtual memory address translation and TLB with necessary diagram. (8)
