Question Paper Code: 59710

B.E. / B.Tech. DEGREE EXAMINATION, MAY 2022

Elective

Mechanical Engineering

01UME910 - PROCESS PLANNING AND COST ESTIMATION

(Regulation 2013)

Duration: Three hours Maximum: 100 Marks

Answer ALL Questions

PART A - $(10 \times 2 = 20 \text{ Marks})$

- 1. What is meant by Work Study?
- 2. Write the Techniques of Work Measurement.
- 3. What are the factors affect the Process Planning?
- 4. What are the benefits of CAPP?
- 5. Define Cost Estimation.
- 6. Differentiate Fixed Costs and Variable Costs.
- 7. What are the Elements of Cost?
- 8. State the different types of allowances.
- 9. State some examples for Direct Labour.
- 10. State the different methods of on-cost allocation.

PART - B (5 x
$$16 = 80 \text{ Marks}$$
)

11. (a) Briefly explain the various techniques of work measurement.

(16)

	(b)	Describe the ergonomics principles applied to instrument design and control example.	with (16)
12.	(a)	Explain the two approaches commonly used in CAPP system and bringing out advantages and limitations.	their (16)
		Or	
	(b)	List the steps involved in process planning and brief.	(16)
13.	(a)	Why costing is essential for industrial control.	(16)
		Or	
	(b)	Explain the various types of elements of cost.	(16)
14.	(a)	Describe the data requirements and sources of information for cost estimation.	(16)
		Or	
	(b)	Briefly explain the various types of estimate.	(16)
15.	(a)	Explain the cost of the product with ladder diagram.	(16)
		Or	
	(b)	A factory is producing 1000 bolts and nuts per hour on a machine. Its material c Rs.75. The factory on cost is 150% of the total labour cost and office on cost is of the total factory cost. If selling price of each bolt and nut is Rs 1.75. Calc whether the factory is going in loss or gain and by what amount.	25%
