Reg. No. :									
------------	--	--	--	--	--	--	--	--	--

Question Paper Code: 37703

B.E. / B.Tech. DEGREE EXAMINATION, DEC 2021

Seventh Semester

Mechanical Engineering

01UME703 - MECHATRONICS

(Regulation 2013)

Duration: Three hours Maximum: 100 Marks

Answer ALL Questions

PART A - $(10 \times 2 = 20 \text{ Marks})$

- 1. What is a smart sensor? List out its functions.
- 2. List down the types of proximity sensor.
- 3. State the function of a control valve.
- 4. Elucidate the significance of Process control valves.
- 5. Give an example for two-step mode control unit.
- 6. How can adaptive controllers be defined?
- 7. What are the main component parts of a PLC?
- 8. Write about the relay?
- 9. List down the applications of wireless surveillance balloon.
- 10. Name the sensors used in car engine management system.

PART - B (5 x 16 = 80 Marks)

11.	(a)	(i) Explain the terms used to define the performance of a measurement system. (8)					
		(ii) Explain working principle of a force measuring transducer with a neat diagram. (8)					
		Or					
	(b)	(i) List some of the methods of temperature control systems and explain anyone with a sketch. (8)					
		(ii) Analyze the factors to be considered in the selection of sensors for a specific application. (8)					
12.	(a)	Explain about the primary functions of mechanical actuation systems. (16)					
		Or					
	(b)	Explain the following mechanical actuation system used in Mechatronics system (i) Cam (ii) Ratchet and pawl. (16)					
13.	(a)	Explain in detail Gain-scheduled and self- turning adaptive control system with a suitable block diagram. (16)					
		Or					
	(b)	With a block diagram explain the velocity control with feedback system for the movement of a load using suitable controller. (16)					
14.	(a)	Explain the factors considered for the selection of a PLC. (16)					
		Or					
	(b)	(i) Explain in detail about jump control used in PLC using a ladder diagram. (10)					
		(ii) Draw the delay ON and OFF timer ladder diagrams. (6)					
15.	(a)	Discuss in detail, various design factors to be considered while designing a mobile robot? (16)					
Or							
	(b)	List out the various sensors used in Engine management system and explain the design of a Mechatronic system used in Engine management system? (16)
