**Question Paper Code: 96B02**

B.E. / B.Tech. DEGREE EXAMINATION, NOV 2022

Sixth Semester

Biomedical Engineering

19UBM602- BIOMECHANICS

(Regulations 2019)

Duration: Three hours

Maximum: 100 Marks

Answer ALL Questions

PART A - (10 x 2 = 20 Marks)

1. Classify the types of forces. State its causes. CO1- U
2. Why do we need constitutive equation? CO1- U
3. Draw the structure of Human Bone. CO2- U
4. Define Composition of Bones. CO2- U
5. Give some examples of Rotational Head injury and its causes and effects. CO3- U
6. Define Accident reconstruction. CO3- U
7. Define Alveoli CO4- U
8. Justify the importance of breathing mechanism. CO4- U
9. List the physics of cardiac diseases. CO5- U
10. Point out the layers of human heart. CO5- U

PART – C (5 x 16= 80 Marks)

11. (a) Explain in detail about the motion mechanics. CO1- U (16)
- Or
- (b) What are the special foci of kinetic and kinematic analyses with suitable examples? CO1- U (16)

12. (a) Explain the types of Complete fracture mechanisms involved in Human Bone and give necessary example relating to that. Draw diagram wherever necessary. CO3- U (16)
- Or
- (b) Explain the types of Incomplete fracture mechanisms involved in Human Bone and give necessary example relating to that. Draw diagram wherever necessary. CO2- U (16)
13. (a) Elaborate in detail about the Skeletal Joints. CO3- U (16)
- Or
- (b) Explain the Forces and stresses in human joints with suitable diagram. CO3- U (16)
14. (a) Sketch the mechanism of Alveoli and explain its function CO4- App (16)
- Or
- (b) Illustrate the interaction of blood and lung and draw its structure CO4- App (16)
- 15 (a) Sketch the physics of cardio vascular system and explain its function CO5- App (16)
- Or
- (b) Interpret the heart diseases that can be cured related to prosthetic heart valves replacement. CO5- App (16)
