**Question Paper Code: 98466**

B.E. / B.Tech. DEGREE EXAMINATION, NOV 2022

One credit

Electronics and communication Engineering

19UEC866 - ARDUINO Programming

Regulations 2019

(Common to all branches)

Duration: 1.30 minutes

Maximum: 30 Marks

Answer ALL Questions

PART A - (1 x 30 = 30 Marks)

- Do Arduino provides IDE Environment?  
(a) True (b) False (c) All the above (d) None of the above
- Arduino has both software and \_\_\_\_\_ board.  
(a) Timing circuit (b) Break the circuit (c) Programmable circuit (d) Feedback circuit
- The Arduino board is also called a \_\_\_\_\_?  
(a) Microprocessor (b) Timer (c) Oscillator (d) Microcontroller
- Expand IDE full form \_\_\_\_\_?  
(a) Integrated Development Environment (b) Interfaced Developed Module  
(c) Interleaving Deficit Expander (d) Interleaving The Developed Environment
- Code writing and uploading into the board is done using \_\_\_\_\_?  
(a) Environment (b) PC (c) IDE (d) SOME
- Arduino doesn't require separate \_\_\_\_\_ to load code on the board.  
(a) Storing (b) Programmers (c) Initializer (d) Oscillator
- \_\_\_\_\_ is the language used by the Arduino IDE to code easily.  
(a) C (b) C++ (c) Java (d) Python
- \_\_\_\_\_ is the best product in the Arduino family for Beginners.  
(a) Divide (b) Uno (c) Thrive (d) None of the above
- Without \_\_\_\_\_ Arduino cannot be run.  
(a) Power source (b) Regulator (c) Inverter (d) None of the above
- Expand the full form of USB is \_\_\_\_\_?  
(a) United Serial Bus (b) Universal Serial Bus  
(c) United Search Bus (d) None of the above
- If the voltage is greater than \_\_\_\_\_, then the Arduino will destroy.  
(a) 10 (b) 30 (c) 20 (d) 05

12. Approved voltage for Arduino types are \_\_\_\_\_ volts.  
 (a) 3 and 5                      (b) 5 and 10                      (c) 6 and 12                      (d) None of the above
13. To ground the circuit \_\_\_\_\_ pin is used in Arduino.  
 (a) PIN                      (b) GND                      (c) RESET.                      (d) None of the mentioned.
14. The 5V pin of Arduino supplies \_\_\_\_\_ volts of power.  
 (a) 2.5                      (b) 10                      (c) 5                      (d) 0
15. How many Analog pins exist in Arduino?  
 (a) 9                      (b) 10                      (c) 5                      (d) 6
16. Analog pins \_\_\_\_\_ the signals from an analog sensor.  
 (a) Write                      (b) Read                      (c) Peruse                      (d) Study
17. The 3.3V pin of Arduino supplies \_\_\_\_\_ volts of power.  
 (a) 3.5                      (b) 10                      (c) 5                      (d) 3.3
18. After conversion from analog to digital value is read by \_\_\_\_\_?  
 (a) Temperature sensor                      (b) Oscillator                      (c) Wavelet                      (d) Timers.
19. \_\_\_\_\_ pins are known as digital pins in Arduino.  
 (a) 10                      (b) 11                      (c) 12                      (d) 13
20. Expand PWM full form \_\_\_\_\_?  
 (a) Pulse Width Modulation.                      (b) Pulse Wide Modulation  
 (c) Plain width modulation                      (d) None of these
21. Expand AREF full form \_\_\_\_\_?  
 (a) Analog Revalue                      (b) Analog reference  
 (c) Annuity reference                      (d) Amplified reference
22. TX pin represents \_\_\_\_\_ in Arduino board.  
 (a) Transmits                      (b) Receives                      (c) Ground                      (d) Restarts
23. \_\_\_\_\_ authorizes the amount of voltage to get into the Arduino board.  
 (a) Voltage stabilizer                      (b) Voltage regulator                      (c) Amplifier                      (d) Oscillator
24. ARDUINO UNO power regulator can handle voltage from 7 to \_\_ volts DC.  
 (a) 10                      (b) 15                      (c) 12                      (d) 13
25. Arduino can work on a variety of \_\_\_\_\_ like windows, Linux, and mac.  
 (a) Platforms                      (b) Elements                      (c) Batteries                      (d) Components
26. Arduino boards having double pins that provide interfacing for \_\_\_\_\_?  
 (a) Programming                      (b) Technical issue                      (c) Marketing                      (d) Simulating
27. Level shifter circuits are used to convert from RS-232 and \_\_\_\_\_ level signals.  
 (a) TTL                      (b) RTL                      (c) SCL                      (d)
28. Every board of Arduino has a five volts \_\_\_\_ regulator?  
 (a) Vertical                      (b) Linear                      (c) Horizontal                      (d) None of the above
29. \_\_\_\_\_ are pre built circuit boards that fit on top of Android  
 (a) Sensor                      (b) Data types                      (c) Breadboard                      (d) Shields
30. Some Arduino boards contain a \_\_\_\_\_ circuit for conversion of level signals.  
 (a) Oscillator                      (b) Amplifier                      (c) Level Shifter                      (d) Shift register
