		Civil	Engine	eering							
	190	JEC954– Fundament	al of I	Digital In	nage F	rocess	ing				
(C	Common to CSE, EEE	, Mechanical, IT, Cl	nemica	ıl, Agricu	ulture	and Bi	omedi	cal E	ngin	leerin	ıg)
		(Regu	lation	2019)							
Dur	ation: Three hours						Max	imur	n: 1()0 M	arks
		Answer .	ALL Ç	Questions	5						
		PART A -	(5x 1 =	= 5 Mark	ks)						
1.	At what points, a continuous image is digitized?									CO	1- U
	(a) Sampling	(b) Vertex	(c) (Contour			(d)	Ran	dom		
2.	The procedure don individual pixels kn	e on a digital imag own as	ge to a	alter the	value	es of i	ts			CO	3- U
	(a) Geometric Spatial Transformation			(b) Single Pixel Operation							
	(c) Image Registration			(d) Neighbour hood Operations							
3.	For line detection we use mask							CO4- U			
	(a) gaussian	(b) laplacian			(c) ideal		(d) bu	tterw	orth
4.	Mean filter reduce r	ioise using								CO	5- U
	(a) sharpening	(b) blurring	(c) r	estoratio	on		(d) a	cquis	sition	1	
5.	Closing with rolling	SE								CO	6- U
	(a) Sharps	(b) Shrinks	(c) S	Smooths			(d) I	Delete	es		
		PART – B	(5 x 3=	= 15 Mar	ks)						
6.	List the applications	s of color models?								CC)1-U
7.	Give any two prope	rties of DCT								CO	2- U
8.	Explain boundary and region descriptors									CO	4- U
9.	Explain singular val	ue decomposition								CO	5- U

10.	Wh	at are the two main operations of Morphology	CO6- U							
PART – C (5 x 16= 80Marks)										
11.	(a)	Explain the basic relationship between pixels	CO1- U	(16)						
	(b)	Or Explain 1D and 2D Discrete Fourier Transforms and their Properties in detail	CO2- U	(16)						
12.	(a)	Explain histogram and histogram equalization with neat diagrams in detail.	CO3- U	(16)						
		Or								
	(b)	Explain the concept of image smoothing in frequency domain	CO3- U	(16)						
13.	(a)	Explain image degradation model /restoration process in detail. Or	CO4- U	(16)						
	(b)	Describe the various geometric transformations used for image restoration	CO4- U	(16)						
14.	(a)	Discuss in detail about the threshold selection based on boundary characteristics and explain the techniques that uses thresholds in image segmentation	CO5- U	(16)						
		Or								
	(b)	Explain region based segmentation using region splitting and merging with an example.	CO5- U	(16)						
15.	(a)	Explain how erosion and dialation in performed in image processing	CO6- U	(16)						
	(b)	Or Elaborate the morphological algorithm for thinning in detail along	COGU	(16)						
	(0)	with boundary Extraction algorithm	00-0	(10)
