Question Paper Code:U9206

B.E./B.Tech. DEGREE EXAMINATION, NOV 2024

Professional Elective

Mechanical Engineering

21MEV206 - NEW PRODUCT DEVELOPMENT

(Regulations 2021)

| Duration: Three hours | | Maximum: 10 | Maximum: 100 Marks | | | |
|-----------------------|---|-------------------|---------------------------|-----------------|--------|--|
| | | Answer | ALL Questions | | | |
| | PART A - $(10 \text{ x } 1 = 10 \text{ Marks})$ | | | | | |
| 1. | If performance meets co | nsumer expecta | tions, the consumer is, | | CO1-U | |
| | (a) Satisfied | | (b) Dissatisfied | | | |
| | (c) Delighted | | (d) Happy | | | |
| 2. | Finding new ways to cre | ate more satisfy | ying products for custome | rs is called | CO1- U | |
| | (a) customer centered pr | oduct developm | nent | | | |
| | (b) team based product d | levelopment | | | | |
| | (c) systematic product de | evelopment | | | | |
| | (d) concentration based | development | | | | |
| 3. | Heat transfer problem de | epends on | | | CO1- U | |
| | (a) Thermal conductivity | | (b) heat coeffi | icient | | |
| | (c) ambient temperature | | (d) All the ab | oove | | |
| 4. | The washer for the med process. | chanical joint is | s an example of which o | f the following | CO1- U | |
| | (a) Progressive forming | | (b) Piercing | | | |
| | (c) Punching | | (d) Blanking | | | |
| 5. | In Engineer's scales, des | ignation M5 in | dicates | | CO1- U | |
| | (a) 1:200 | (b) 1:20 | (c) 1:100 | (d) 1:50 | | |

A

| 6. | What precise movement does CMM have? | | CO1- U |
|-----|---|--|---------------|
| | (a) Precise progress in x coordinate | | |
| | (b) Precise progress in x and y coordinates | | |
| | (c) Precise progress in y and z coordinates | | |
| | (d) Precise progress in x, y and z coordinates | | |
| 7. | . The commonly used frequency range for ultrasonic testing is | | |
| | (a) 5Hz-10Hz | (b) 10Hz-20Hz | |
| | (c) 20kHz-10MHz | (d) 50MHz -100MHz | |
| 8. | Marketers have traditionally classified produc | ts on the basis of | CO1- U |
| | (a) Durability, tangibility, and use. | (b) affordability, tangibility, and us | se |
| | (c) availability, tangibility, and use | (d) aesthetics, tangibility, and use | |
| 9. | The importance of standard operating procedu | ires is | CO1- U |
| | (a) To ensure consistent execution of key pro | cesses. | |
| | (b) Processes can only be improved if they are | e written down. | |
| | (c) The Department Labour requires that all keep | ey processes be written down. | |
| | (d) None of these | | |
| 10. | Concurrent engineering deals with carrying ou | it the following activities, | CO1- U |
| | (a) design and marketing | (b) manufacturing and sales | |
| | (c) design and re-engineering | (d) design and manufacturing | |
| | PART – B (5 x 2 | = 10Marks) | |
| 11. | Interpret Engineering Change Note (ECN). | | CO1-U |
| 12. | Differentiate DFMEA vs. PFMEA. | | CO1 -U |
| 13. | Explain a request for quotation (RFQ) | | CO1 -U |
| 14. | Describe purchase frequency. | | CO1 -U |
| 15. | List the importance of SOP. | | CO1 -U |

| | | PART – C (5 x 16= 80Marks) | | |
|-----|-----|--|-----------|------------|
| 16. | (a) | Outline about an Engineering Bill of Materials (EBOM) | CO1 - U | (16) |
| | | Or | | |
| | (b) | Illustrate the QFD and their application in industries. | CO1 - U | (16) |
| | | | | |
| 17. | (a) | Prioritize failure modes based on severity, frequency, and how easily you can detect the failure modes. | CO1 - U | (16) |
| | | Or | | |
| | (b) | Discuss about the fundamentals of FEA and Bend Analysis on a specified material. | CO1 - U | (16) |
| 18. | (a) | Identify the Process of Request For Quotation (RFQ) CAD/CAM systems and optimizing production workflows. | CO3 -App | (16) |
| | | Or | | |
| | (b) | Apply drafting and design that are used in product development. | CO4 -App | (16) |
| 19. | (a) | Select the Magnetic Particle Testing (MPT) on product design and development of a new product. | CO4 - App | (16) |
| | | Or | | |
| | (b) | Apply Horizontal Deployment as Problem Solving Technique in industry. | CO4 U | (16) |
| 20. | (a) | Apply Reverse Engineering approach in a new product | CO5 - App | (16) |
| | | development. | | |
| | | Ur | | (1 |
| | (b) | Develop Cloud points and convert the cloud data into a 3D model | CO5- App | (16) |
